CIRCULATING THROUGHOUT THE VAST AGRICULTURAL AREA OF PALM BEACH COUNTY

More Acres Under State Fire Control

More than 483,000 additional Florida woodland acres came under fire control this month when four more counties added Florida Forest Service fire control units. With 56 of Florida's 67 counties containing 18,729,872 woodland acres now under countywide protection, less than two million forest acres now remain unprotected, announced State Forester C. H. Coulter from Tallahassee today.

The four newly-protected counties and their amounts of forest acreage are: Dade—310,976 acres; Dixie—388,400 acres; Lafayette—290,500 acres; and Okaloosa—153,600 acres. Considerable acreage in Dixie and Lafayette was formerly protected by the old Dixie Fire Control Unit. Some additional acreage was picked up as these two counties gained countywide protection.

Installation of fire control equipment has begun in all the new counties, with funds being provided by the Florida Board of Forestry. Each county will pay matching funds to defray operating expenses at the rate of three cents per forested acre. The first year budgets are: Dade, \$208,348; Dixie, \$125,830; Lafayette, \$117,770; Okaloosa, \$173,135. The second year, after equipment and installations are completed, requires only about one-third of the initial budget.

Coulter also announced the appointments of County Rangers for the four new counties. All are in-

(continued on page 4)

Appetite Problem During Summer

As your hair style droops and your body seems a little lax, you can always say, "It's not the temperature, it's the humidity."

The same is true of your appetite. Summer heat and humidity frequently cause a lack of mealtime interest, says Miss Mary Todd, Extension Home Economist for Palm Beach County. What are some of the things you can do to perk up fading family members' appetites? Miss Todd suggests:

1 Plan menus that are light in texture but solid in nutrition. Avoid letting "snacks" take the place of mealtimes. You may find it more convenient to serve four or five smaller meals a day rather than three heavier meals.

Salads made with meat, fish or poultry, one-dish meals, barbecues or cookouts the whole family can enjoy are examples of menus that pack summer magic.

2 Start each day with a good breakfast. Remember left-over cold meats can be ideal breakfast foods when teamed with a glass of orange juice and a piece of toast.

Today our markets are selling quick-mix liquids for breakfast. Try them in your favorite flavors, if your family refuses to sit down to a meal.

3 Avoid serving only cold foods. Serving some warm foods will help to equalize the body's temperature with the surrounding air, thereby making you feel cooler.

4 Highly spiced foods sometimes

"Evercane" Sugar Refinery at Clewiston Will Be Completed Shortly

It was announced recently that the refinery of Everglades Sugar Refinery, Inc., located at Clewiston, Florida, will be completed and in full production shortly. This refinery has been under construction for the past 18 months and has been producing liquid sugars and blends of liquid sugars since last Fall. Production of granulated sugar a week ago signaled the end of the construction stage and final completion of the plant will take place within the next few weeks.

The refinery is of the most modern design and is the only sugar refinery in the State of Florida producing both liquid and granulated sugar.

Everglades Sugar Refinery will have a capacity of 100,000,000 pounds of sugar annually, all of which will be produced from Florida grown raw sugars. The operation will add several millions of dollars each year to the South Florida economy.

Its sugars are marketed under the trade name "EVERCANE".

Granulated sugar will be initially marketed in bulk and 100 lb. bags. In the very near future 2 and 5 lb. consumer packages will also be made available.

The Resident Manager of the refinery is George Fawcett, a graduate of Georgia Tech, who has had more than 15 years experience in the sugar refining industry. The Assistant Manager is Calvin Walters, a chemistry graduate of Eucory University with 9 years of refining service.

LOCALS

Mrs. Arch Blakey has returned to her home from a visit in Arapahoe, Oklahoma, with her sister.

Mr. and Mrs. C. L. Story and children, Pam, David and Ronnie, have returned from a vacation in the mountains.

Mr. and Mrs. Bill Kennedy have returned home after spending the summer in Danville, New York.

Dr. and Mrs. R. R. Long and son, Ramie, and daughter, Mrs. R. D. Welker and children, Andrea and Greg, have returned from Fort Myers Beach.

Mr. and Mrs. Ron Tep Haar left this week for a three-week vacation with relatives in Michigan.

Mr. and Mrs. C. E. Williams returned from Camp Ridgecrest on Monday, August 16. Frankie Tillis also returned.

Mrs. J. L. McCall, Jr., returned to her home in Georgia after a two-week stay with Mr. and Mrs. J. L. McCall, Sr., in Canal Point.

Wayne Hundley and Walter Young spent the past two weeks on Sanibel Island. Mr. and Mrs. John Hundley spent the last week with them at their cottage on the beach.

PAHOKEE HOME BURNS

The home of Mr. and Mrs. I. G. Thompson, 219 West Main Street, was completely demolished by fire Saturday night, August 7. The Thompsons were fortunate in getting out of the blazing building before they were injured. Cause of the fire has not been determined.

Albert Fremd has been home for several days from the Everglades Memorial Hospital where he underwent an operation for the removal of his appendix. He has recovered nicely.

Everglades News Vacation Again

It's vacation time again at The Everglades News office and we are off for a fishing trip and a little well deserved rest from our arduous duties of turning out a newspaper every week. We'll be back on the job on August 25th and once again turn out a readable newspaper with plenty of news in it.

This week you'll receive your paper as usual but the regular amount of news will be short because we are printing the paper in advance so that we can have the aforementioned vacation. We'll make up for the scarcity of news this week during the other 50 weeks of the year.

HOME FROM NASSAU

Dr. and Mrs. Leo Hebert and son John just returned from a trip to Nassau this weekend. They toured colorful Rawson Square, visited the Native Straw Market, climbed the Queen's Stairway, listened to the Native Calypso Band in the Famous Tree Hou of beautiful Royal Victoria Garden. They reported a wonderful and enjoyable trip.

SCHOOL OPENS AUGUST 30

Palm Beach county schools are scheduled to open for the 1965-66 term on Monday, August 30, according to an announcement by Supt. Robert Fulton. Glades schools have their teachers lined up and are ready for the opening.

GOES TO TENNESSEE

Mrs. J. R. York of Pahokee left over the weekend for Maryville, Tenn., where she will spend some time with her daughter and son-in-law. Mr. and Mrs. Browning Roach. Mr. Roach has been seriously ill for several months.

Food Poisoning Summer Increase

The increased number of reported infections caused by bacteria in food has focused on the control of the Salmonella bacteria. And they are everywhere. People, meat animals, poultry, household pets, mice and flies carry the infection. Milk and eggs from infected sources also may be carriers. Salmonella are found in the air, in dust and in unprotected water supplies.

Miss Mary Todd, Extension Home Economist for Palm Beach County, advises that there are two types of food-borne illnesses. One results from eating or drinking food containing harmful bacteria, and the other from food in which bacteria have grown and developed a poison.

To cause a gastrointestinal infection, Salmonella bacteria, present in food must multiply or incubate in the intestinal tract. Symptoms of food infection are nausea, headache, vomiting, abdominal cramps, diarrhea and general weakness. The number and intensity of symptoms will vary with the degree of food contamination plus individual resistance.

Here are three simple rules for food safety: (1) Keep cold things cold. (2) Keep hot things hot and (3) Keep a constant check on sanitary housekeeping practices.

Bacteria grow best at temperatures between 45 degrees F. and 120 degrees F. and refrigeration at about 40 degrees F. helps to retard the growth of these bacteria in foods. Any delay in refrigeration will allow bacteria to grow more rapidly.

Heat will kill bacteria. When the center of food being cooked reaches a temperature of 165 to 170 degrees F., you can be sure that harmful bacteria have been destroyed. Before using leftover

(continued on page 4)

Underwater Show At Weeki Wachee

Too old for fairy tales??? Then you're in for a surprise when you visit Florida's sparkling west coast this year!

Florida's Weeki Wachee has combined Lewis Carroll's famed classic, "Alice in Wonderland," with the fable of Mermaids and come up with the most unusual underwater extravaganza ever staged in the watery depths of their Underwater Grand Canyon!

This fascinating performance is seen by Florida visitors who sit 16 feet below the surface of the water in a special underwater theatre which keeps them dry as a bone behind 19 huge plate glass windows... each one 3 inches thick.

The visitors behold a spectacle that would warm the barnacled heart of King Neptune himself as thirty beautiful mermaids, in teams of six, entertain for 45 minutes without once surfacing for air. However, even mermaids must breathe, so the girls do take an occasional breath from standard Navy-type air hoses.

Seen underwater in this unique theatre, you are suddenly confronted by a mass of "tiny air bubbles" coming out of the spring's bottom. Rising slowly to the surface, they simulate millions of glittering diamonds floating in the water. As the curtain rises, lovely and talented Mermaids appear from behind the shimmering bubbles to demonstrate their skill.

Then the entire fascinating world of the Mermaids' watery domain unfolds before your eyes as you watch Alice's adventures with some of the strangest characters ever found "under the world". Such as the comical Mad Hatterfish, the White Rabbitfish, two mischievous barrelfish, Tweedle Dee and Tweedle Dumm, and even the Cheshire Catfish!

Last, but far from least, Alice

(continued on page 4)

Florida P. U. C. Has New Name

TALLAHASSEE — The Florida Public Utilities Commission is now the Florida Public Service Commission as the result of an act passed by the Legislature and signed into law by Gov. Haydon Burns.

This is the third time the Commission's name has been changed since it was established in 1887 as the Railroad Commission.

Back in 1946 it became the Railroad and Public Utilities Commission and in 1963 the reference to the agency became known as the Florida Public Utilities Commission.

"Our new name describes better the board area of responsibilities with which we have been charged," commented Commissioner William T. Mayo. "We believe the new name will more accurately reflect our determination to perform them honestly and efficiently in the public interest."

Florida's transportation industry, including motor carriers as well as railroads, and a wide variety of utilities—electric, communications, natural gas, water and sewer—are regulated by the commission.

Guava Season In South Florida

Does the name Guava mean anything to you? It means delicious eating to residents of South Florida as once again the Guava season approaches!

Mrs. Betty Woolfe, Assistant County Extension Home Economics Agent, says the red-fleshed, fresh sweet guava may be eaten raw out of the hand or served with ice cream. Guava shells make a delicious breakfast fruit, too, low in calories (only 70) and a rich source of Vitamin C. For sour cream lovers, try lightly dusting the chilled guava shells with ground nutmeg and top with a tablespoon or two of sour cream. Different and delicious.

The sour or highly acid guava lends itself to cooking, canning or freezing. This fruit is recognized by its characteristic thick-walled white fleshed fruit. Freezing is often the preferred method for preserving the fruit since the vitamin C value is lost in processing with heat.

The ripe fruit usually is harvested from the ground and the remainder picked from the tree. The guavas do not ripen at one time and it may be necessary to pick the trees more than once a week to secure high quality fruit for processing. Avoid bruising by careful handling and refrigerate until enough are collected for cooking.

Guava jelly is a favorite. If you would like a tested recipe, please write Mrs. Woolfe at 531 North Military Trail, West Palm Beach, for the Agricultural Extension Service Circular on Guavas.

The guava tree is valuable not only as a fruit bearing tree, but can be a shady haven on a hot summer day.

The guava tree can be trained by pruning to grow as a rather handsome, symmetrical, low-headed tree with a spreading top. The guava tree can be grown successfully on a wide range of soils and may reach a height of 30 feet with an equal spread, where growing conditions are favorable. If allowed to grow unmolested, the guava becomes a large shrub or small tree branching rather freely close to the ground.

Youth Is Winner \$500 Scholarship

GAINESVILLE—Don Harrison, 21, of DeFuniak Springs, has been awarded a \$500 agricultural scholarship provided by the Florida Thoroughbred Breeders Assn., Dean of Agriculture Marvin A. Brooker announced today.

Harrison is a senior in ornamental horticulture at the University of Florida College of Agriculture and will graduate April 1965. He is currently employed by the U. S. D. A. Agricultural Stabilization and Conservation Service as a summer student trainee in Moore Haven, Florida.

The Walton County youth is the son of Henry O. Harrison, who recently retired after 21 years as county agricultural agent in DeFuniak Springs.

Five-hundred dollars a year is given to each recipient by the Thoroughbred Breeders Assn. until student graduates. "A freshman winner could receive as much as \$2000 from this scholarship," said Dean Brooker.

The annual scholarship is granted to an outstanding agricultural student who has received recommendation from his county agricultural agent, according to Bonnie Heath Farm of Ocala.

Clifford L. (Pete) Davis, past State 4-H president from Perry, Fla., received the scholarship last year.

Don Harrison will leave for St. Louis Mo., on August 1, as one of 54 of the nation's top agricultural students, to take part in the Ralston Purina Co.-sponsored Danforth Summer Fellowship which he won earlier this summer.

Shoppers Beware Summer Specials

TALLAHASSEE — With the summer sale season in full swing, you may need to sharpen your shopping skills so you'll make wise choices.

That's the word from home economics with the Florida Agricultural Extension Service.

"Take a close look at the inviting advertisements describing the

various sales and understand the terms of each sale.

Remember, an item is no bargain if you don't really need it, no matter how economically it may be priced. Don't go overboard on bargain-buying just for the sake of buying.

Here are some basic consumer information guides to aid you in shopping:

Consider off-season buying. There may be less choice of items, but this need not be a disadvantage when purchasing standardized items such as socks or white goods.

Understand guarantees. Know who is responsible for fulfilling the guarantee agreement. Have the terms of the guarantee beam cut along with the price? Examine all sales items carefully. Be a smart shopper.

Mr. and Mrs. Emmett Stapleton and family left Friday for a vacation in Hazlet, Ga. to visit relatives. While there they will attend the Stapleton family reunion in Lumber City, Ga.

The U.S. Government does not pay for this advertising. The Treasury Department thanks The Advertising Council and this publication for their patriotic support.

FLORIDA POWER & LIGHT COMPANY HELPS BUILD FLORIDA

New $3\frac{3}{4}\%$ interest on U.S. Savings Bonds

The Treasury explains why the new ones you buy and the ones you own now are better than ever

Q: How does the new $3\frac{3}{4}\%$ interest rate benefit me?

A: With Series E Bonds, the rate turns \$18.75 into \$25.00 fourteen months faster than the old rate. Your savings increase faster, because your Bonds mature in just 7 years, 9 months.

With Series H Bonds, the 10-year maturity period stays the same but more interest is paid you each six months. With both E and H Bonds the new rate works out to $2\frac{1}{2}\%$ for the first year and a half; then a guaranteed 4% each year to maturity.

Q: When did the new rate become effective?

A: June 1, 1959.

Q: Does the new rate change the Bonds I bought before June 1, 1959?

A: All older E and H Bonds pay more now—an extra $\frac{1}{4}\%$ from now on, when held to maturity. The increase takes effect in the first full interest period after June 1.

Q: Will the Bonds I own automatically earn their new rate?

A: Yes. You don't need to do a thing—just hold on to your Bonds.

Q: When my E Bonds mature, will they keep on earning interest?

A: Yes. An automatic 10-year extension privilege went into effect along with the new interest rate. This means your E Bonds will automatically keep earning interest after maturity.

Q: With the new interest rate, should I cash in my old Bonds and buy new ones?

A: No. The automatic $\frac{1}{4}\%$ increase makes it unnecessary—and in almost every case it is to your advantage to retain your present Bonds.

Q: How are series H Bonds different from series E Bonds?

A: The chief difference is this: You buy H Bonds at full face value and the interest is paid by Treasury

check every six months for the life of the Bond. You buy E Bonds at 75% of face value and the interest accumulates to maturity. H Bonds provide income for living expenses, while E Bonds build a nest egg for the future. That's why many retired people hold H Bonds and families saving for, say, a child's education, buy E Bonds.

Q: In what denominations can I buy series E and series H Bonds?

A: E Bonds: \$25 (cost \$18.75), \$50 (cost \$37.50), \$100 (cost \$75.00); \$200 (cost \$150.00), \$500 (cost \$375.00), \$1,000 (cost \$750.00), \$10,000 (cost \$7,500.00).

H Bonds: \$500, \$1,000, \$5,000, and \$10,000. They are priced at face value.

Q: How safe are U.S. Savings Bonds?

A: Savings Bonds are an absolutely riskless way to save. The United States Government guarantees the cash value of your Bonds will not drop, that it can only grow.

Q: What if my Bonds should be lost, stolen or destroyed?

A: You can't lose. Every Bond purchased is recorded by the Treasury. If anything happens to your Bonds they are replaced—free.

Q: Where can I buy Bonds?

A: Buy E Bonds at any bank—it takes only a few minutes. Buy them automatically through the Payroll Savings Plan where you work. This Plan means you can have any amount you name automatically deducted every payday. The Bonds you buy by installments are delivered to you automatically, too. Your bank will take your order for H Bonds.

Q: How do I help strengthen America's peace power when I buy U.S. Savings Bonds?

A: Peace costs money—money for military strength and for science. And money saved by individuals helps keep our economy sound.

YOU SAVE MORE THAN MONEY WITH U. S. SAVINGS BONDS

Food Poisoning—

(Continued From Page 1)
food that has been refrigerated 36 hours or longer, be sure to recook it.

If much hot food must be refrigerated, precook it first in a shallow pan of cool water. Unless the cooling unit is overloaded, it is perfectly safe to put hot things in today's modern refrigerators.

A clean refrigerator, range, cooking utensils and equipment are musts. Get rid of flies, roaches and other insects around the kitchen and food storage areas. Wash dishes carefully in hot, sudsy water, and rinse with hot water. And be sure to wash your hands thoroughly before preparing or handling food.

The high-protein, nonacid foods are particularly vulnerable to contamination. They include fish, custard-filled pastries, egg mixtures, meat sandwiches, leftover poultry, baked ham, creamed foods and dressings and desserts containing mayonnaise.

More Acres Under —

(Continued From Page 1)
service promotions of experienced personnel. They are: Dade—James Keen, formerly County Ranger in Highlands County; Dixie—Milton Howell, formerly Unit Ranger of the Dixie Fire Control Unit; Lafayette—Bobby Joe Charles, formerly Assistant County Ranger in Taylor County; Okeechobee—Robert Dempsey, formerly Assistant County Ranger in Polk County.

The County Ranger is the principal fire control representative in each county. He's responsible for all phases of the fire control program within the county, including fire prevention, law enforcement, detection, suppression and suppression of wildfires. Additional personnel to operate the fire control units are hired locally when available.

Coulter also foresees a great future for forestry in Florida, calling it a "billion dollar income producer and high on the list for outdoor recreation—an increasingly important partner in the multiple

use of our forest lands." He promised the best possible fire control for the four new counties, saying, "The Florida Board of Forestry and all of us in the Florida Forest Service look forward to the day when all of Florida can benefit from 'Statewide' fire control."

The coming of countywide fire control to the adjacent counties of Dixie and Lafayette brings west and north Florida solidly under forest fire control. Non-protected counties remaining, from north to south, are: Citrus, Brevard, Pasco, Osceola, Hardee, DeSoto, Martin, Palm Beach, Broward and Monroe. Some 140,000 acres in Hendry County have group-unit protection—an arrangement whereby a group of private landowners contract with the Florida Board of Forestry for fire control.

In the last 15 years, the amount of protected forest acreage has doubled, while the average annual percent of acreage burned has decreased more than six times. In the years prior to 1949, more than four percent of Florida's protected woodlands burned each year. In the past eight years, this percent of annual burn has averaged less than one-half of one percent.

In startling contrast, says Coulter, more than 20 percent of the unprotected acreage burns annually causing untold damage to timber, soil, water, and wildlife benefits. He credits improved detection and fire-fighting methods, along with increased cooperation from the public and the news media in fire prevention, for the state's steadily improving fire record.

At the present time, state law provides for forest fire control on a county-by-county basis.

Appetite Problem—

(continued from page 1)
make you feel hot and thirsty—so be careful with extremely pungent spices.

5 Stock the refrigerator with crisp, sliced fruits and vegetables and pitchers of fruit juice. Ideal snack-mates for the whole family.

6 Relaxing at mealtime can do a great deal in reducing summer-time tensions. Avoid becoming overly fatigued before eating. It will help you to enjoy a meal and aid your digestion.

Yvonne Thompson Honored At Shower

Miss Yvonne Thompson, bride-elect of Jim Chaplin, was honored with a bridal shower, Tuesday, August 10, from 8:00 till 10:00 p. m. in the community room of Everglades Federal Savings and Loan building.

Greeting guests with the honoree were her mother, Mrs. Joe Thompson and Mrs. Charles Chaplin, mother of the groom-elect. All wore white LaFrance corsages.

A color scheme of pink and white was carried out on the refreshment table which was laid with a white cut work cloth and featured a pink floral arrangement.

Miss Thompson was presented with a silver pastry serving knife as a gift from the hostesses who were: Mrs. Billy M. Sheffield, Mrs. Elmer Jones, Mrs. M. P. Stanley, Mrs. Hugo Boe, Mrs. Richard Hurt, Mrs. Leland Keene, Mrs. C. E. Williams, Mrs. Robert M. Sanders, Mrs. Horace Unwin, Mrs. W. A. Keen, Mrs. Marvin Grady.

Underwater Show—

A message from the Treasury of a free people

How to speak out for freedom today

Free men have never gone in much for silence. Even before the first thirteen States became United States, men were speaking for freedom loud and clear.

Today Americans speak out for freedom many ways—in Congress, in local government, in neighborhood activities. Some speak out for freedom in other languages, in other lands. And millions of Americans speak out for freedom every time they buy U.S. Savings Bonds.

Every Savings Bond you buy is an investment in freedom. While you're saving money for your

own family's future, you're helping Uncle Sam tend to the business of keeping men free today.

Perhaps you don't speak out for freedom in the same tone of voice when you buy a Bond as Patrick Henry did in his famous speech. But you speak every bit as surely. And every bit as proudly.

Why not speak out for freedom now? Buy Bonds at the bank or on the Payroll Savings Plan where you work.

Keep freedom in your future with

Belle Glade Gets \$35,000 Rec Fund By Roberts Effort

The City of Belle Glade will receive some cash aid in its effort to convert a part of Torry Island into a recreational area. The majority of the work in the past has been done by Police Chief Charles Goodlett and prison labor.

The recently created Outdoor Recreational Planning Committee in Tallahassee Monday assured Representative Emmett Roberts and a Belle Glade group that about \$35,000 would be available when the committee meets in August. The money comes from the fund that is collected from the sale of sporting goods in Florida.

Attending the Tallahassee meeting with Roberts and Stretch was J. D. (Pete) McClellan, president of the Chamber of Commerce, along with Luther W. Jones and Fritz Stein, Jr., members of the Broward-Palm Beach Recreation Committee.

Roberts said the standards set by the committee for releasing the funds had been met "in each instance" by the local group.

The city has cleared off a section of Torry Island, provided camp sites, electricity, and toilet facilities, and plans to increase facilities for boating enthusiasts and picnickers.

Winn-Dixie Stores Heavy Purchaser

An increase of more than \$300,000 in the value of Florida fresh fruits and vegetables purchased by Winn-Dixie Stores, Inc., on the Pahokee market during the 1964-65 growing season was reported today.

Purchases during the season just ended totaled \$2,598,210 compared with \$2,233,047 during the 1963-64 growing season. These represented a total of 1,866 carloads compared with 1,591 cars last year. Freight and ice costs amounted to \$340,272.

These fruits and vegetables found their way into shopping baskets in many of Winn-Dixie's 668 supermarkets throughout the South.

"These purchases emphasize our continuing policy of doing business in our own operating areas wherever possible," said Joe A. Adams, in charge of perishable merchandising.

Young Ho! Chevron, Says Standard Oil

LOUISVILLE, KY.—"With the rapidly increasing percentage of motorists in the 18-39 bracket," said Ralph Wooton, advertising manager of Standard Oil Company (Kentucky), "we decided to slant our 1965 gasoline advertising directly at this market, and adopted as its theme 'Young Ho! Go Chevron' . . . Put that Young Ho! spirit in your car!"

"We also feel that with the advent of affluence and security, continuance of youth — or even just the illusion of youth—is one of the greatest desires of people in all age brackets."

Most motorists assume that petroleum products offered at Standard Oil stations are of top quality, and for us merely to repeat this belief and back it up with technical data would leave most customers indifferent.

"With the great volume of advertising to which people are exposed today, we believe they would prefer to be amused by whimsy, rather than technically informed through factual data or scientific

Night Performances At Water Ski Show

NEW YORK—Two night performances of the free Florida Citrus Water Ski Show at the New York World's Fair will be added June 12.

"Popular demand and the overwhelming success of the show in the Florida exhibit have motivated the state and the fair to take this action," Gov. Haydon Burns said. The show opened May 8 with four afternoon performances. It has already played to over a quarter of a million people, according to Burns.

Waddell Retires After 18 Years On Housing Authority

Joe Waddell, pioneer Pahokee resident, farmer and former operator of a grocery store, retired July 19 as a member of the Pahokee Housing Authority after serving in that capacity for 18 years. He was signally honored in Jacksonville last summer by being presented a citation by the Housing Commissioner citing his more than 16 years of continuous service.

Claude Shirley, an original member of the Authority was named by Mayor Duncan Padgett and confirmed by the City Council to replace Mr. Waddell. During the years of his service Mr. Waddell served as chairman on three different occasions. He was one of the original five members of the authority.

Other members of the Authority are M. P. Holman, Bob Applegate, E. L. Pope and J. L. Tyson, Jr. James H. Vann is the executive director and has held that position for the 18 years that the Authority has been in existence.

Junior College Bus From Glades To Started August 16

A recently purchased 72-passenger bus will be in operation from the Glades this coming term to Palm Beach Junior College beginning on August 16. The schedule calls for the bus to start its pickup in Canal Point at the elementary school at 6:10 a. m. and return to that point at 6 p. m.

Pick-up by the bus is as follows:

6:10 a. m. Canal Point Elementary School; 6:20 a. m. Pahokee High School; 6:25 a. m. East Lake High School; 6:55 a. m. Belle Glade High School; 7:00 a. m. Lake Shore High School; 3:15 a. m. arrive at Palm Beach Junior College.

The return trip to the five pickup points is:

3:45 p. m. Leave Palm Beach Junior College; 5:00 p. m. First drop off (Lake Shore); 5:05 p. m. Second drop off (Belle Glade); 5:35 p. m. Third drop off (East Lake High School); 5:40 p. m. Fourth drop off (Pahokee); 5:50 p. m. Fifth drop off (Canal Point). 6 p. m.

The bus will not arrive at Junior College until 8:15 a. m. so students are cautioned not to schedule any 7:30 a. m. classes. The bus will leave the campus on the return trip at 3:45 p. m.

3 Manatees Become Weed Killers For Flood Con. District

MIAMI—Three manatees, sometimes called sea cows, have taken up employment with the state as weed-killers.

The manatees were netted by the Miami Seagrass under a commission from the Central and South Florida Flood Control District and will be used in an effort to rid drainage canals of water weeds and hyacinths.

Manatees are 1,000-pound, vegetarian mammals that live in South Florida waters. They are gentle, bovine and sluggish about everything but their voracious eating of water weeds.

In May, 1964, the Seagrass netted five manatees for the Central and South Florida Flood Control District, and they have been working in drainage canals west of Boca Raton.

They have proved highly efficient at exterminating water weeds and water hyacinths. Not only do they eat the leaves, they eat the roots of the plants and even polish the stones.

The manatee experiment is being conducted by Dr. Peter Sguros of the Florida Atlantic University of Boca Raton under a contract with the Flood Control District. It is being carried on in a canal two and one-half miles long.

Classified Ads

POSITIVELY all want ads or classifieds, as you wish to call them, are payable in advance from his day forward. Don't phone 'em. Write it and drop a dollar bill in the envelope if you want it run once. \$2 if you want it run twice and so on.

WHAT'S IN THE ATTIC that you don't need? A \$1.00 classified ad in this column will probably find you a sale. Just write your ad, enclose a dollar and we'll do the rest. The Everglades News, Canal Point, Fla.

FOR SALE: New and Used Willys Jeeps. Walter Ashley's Garage in Belle Glade, Phone 6-3058. Oct. 17-54-ch.

SEPTIC TANK Service available, by calling me. We do excellent work. Bob Durrance, Phone 924-5268. Sept. 17 pd.

FOR LEASE: 480 acres of land almost ready to farm. Short term or long term lease. Phone after 7:00 p. m. 924-7384 or 924-2951. A6-12-ch.

Thinking Of Building?

THEN YOU'LL WANT TO SEE US!

If your summer vacation is over and you are thinking of building a new home — you'll want to come and see Everglades Federal in Belle Glade or at our branch office in Pahokee. You will find the friendly folks in either place very helpful when it comes to making plans for a new home — and the money to build it. Drop by either place and make inquiry. You'll be glad you did.

Instructions On Cleaning Fish

TALLAHASSEE—If you've got a fisherman in the family, you'll probably face some fish-cleaning chores now and then.

Home economists with the Florida Agricultural Extension Service

offer these tips on cleaning and dressing fish.

Wash the fish. Then remove the scales by scraping the fish gently from the tail to the head, using the dull edge of the knife.

Cut the fish the entire length of the belly, from vent to head, and remove the entrails. Then remove the head by cutting above the collarbone and breaking the backbone over the edge of a cut-

ting board or table.

Remove the large back fin by cutting the fish along each side and pulling the fin out. Never trim the fins with shears or knife because the bones at the base of the fin will be left in the fish. Wash the fish thoroughly in cold running water. It is now dressed, ready to cook.

Large dressed fish may be cut crosswise into steaks for freezing.

Cut steaks about 3-4 inch thick.

For fillets, cut down the back of the fish from the tail to the head. Then cut down the backbone just above the collarbone. Turn the knife flat and cut the fish along the backbone to the tail, allowing the knife to run over the rib bones. Lift off the entire side of the fish in one piece. Turn the fish over and cut fillet from the other side. You may also skin the fillets.

If you're planning to freeze fish steaks and fillets, give them a 30-second dip in a solution made up of two-thirds cup salt to one gallon of water. Then wrap and freeze them.

Mr. and Mrs. Frank Rosenberg have as their guests this week his sister and brother-in-law, Mr. and Mrs. Jimmy Fitzgerald, of Hawkinsville, Ga., and their son, Drew.
